

ECOTOP LIME

PRODUCT BENEFITS

- Adjusts pH levels, allowing the plant and/or lawn to easily absorb nutrients.
- Increases resilience.
- Promotes nutrient intake.
- Improves water permeability and aeration of the soil.
- Easy to apply (fine granular).
- Approved for use in organic farming according to regulations (EU) No 2018/848 and (EC) No 889/2008.

PACKAGING

Bagged goods
25KG (40/pallet)

Big Bag
600 KG

DOSAGE

1,0 – 1,5 kg / 10 m²

APPLICATION PERIOD

To be used only in case of recognized need.

J F M A M J J A S O N D

COMPOSITION

Indicated nutrient contents in mass percent:
30% total calcium oxide (CaO) (=21.5% Ca), 20% total magnesium oxide (=12.1% Mg), 54% neutralizing value, 33% reactivity (hydrochloric acid residue).

Particle size: granules, 90% of the product passes through a 5 mm mesh sieve.

Components:
Dolomite (1), CAS No. 16389-88-1; Magnesium sulfate (1), CAS No. 7487-88-9.

(1) Substances and mixtures as primary materials.

NB

Do not exceed the quantities required. Store dry, frost-free and below 30 degrees. Not for human and animal consumption. Be careful with cattle after spreading klak, wait with it or let it soak into the soil first.

Since Ecotop BV has no control over the use, storage and improper application of its products, no liability can be accepted for reduced performance or possible damage..

Product recommendations are informational only and do not lead to a commitment or agreement. Directions for use are based on practical experience and research. Each plant and cultivation system has its own fertilizer requirements. Legal (fertilizer) standards are also important in determining the dose. It is advisable (good practice) to test new applications on a small scale in advance each time. Fertilizers cause an EC increase and can affect pH. It is essential to take all these factors into account when using a fertilizer product or combining different fertilizers. Ecotop accepts no liability for consequential damages when using its products.
