

ECOTOP WORM MANURE

PRODUCT BENEFITS

- Stimulates root growth naturally.
- Increases plant resistance to diseases and pests.
- Contains essential nutrients, enzymes, fungi and microorganisms.
- Stimulates soil life naturally.
- Allows plants to better absorb nutrients.
- Has a long-lasting effect.
- Improves the soil structure.

PACKAGING

Big Bags
500L, 1000L, 1500L

DOSAGE

2 – 5 Liter per m²

APPLICATION PERIOD

Applicable all year round

SAMENSTELLING

Dry matter 50 %
Crude ash 233 g/kg ds
Organic matter 229 g/kg ds
Nitrogen 5.52 g/kg ds
C/N ratio 19
Ammonia-nitrogen 1.3 g/kg ds
Nitrogen-organic 4.2 g/kg ds
Phosphorus 0.8 g/kg ds
Phosphate 1.80 g/kg ds
Potassium 2.2 g/kg ds
Potassium 2.7 g/kg ds
Magnesium 2.2 g/kg ds
Magnesia 3.5 g/kg dsl.
Sodium 0.5 g/kg ds
Natron 0.5 g/kg ds

NB

Livestock should not be allowed on the land for at least 21 days after using this on the land. Store dry and frost-free. Not for human or animal consumption.

As Ecotop BV has no control over the use, storage and improper application of its products, no liability can be accepted for reduced performance or possible damage.

Product recommendations are informational only and do not lead to a commitment or agreement. Directions for use are based on practical experience and research. Each plant and cultivation system has its own fertilizer requirements. Legal (fertilizer) standards are also important in determining the dose. It is advisable (good practice) to test new applications on a small scale in advance each time. Fertilizers cause an EC increase and can affect pH. It is essential to take all these factors into account when using a fertilizer product or combining different fertilizers. Ecotop accepts no liability for consequential damages when using its products.
